BEDDING PLANTS PERENNIALS ROSES

1929

VALENTIN BURGEVIN, INC.

Florists KINGSTON
NEW YORK

"Say it with Flowers"

Let your message of congratulation or condolence be conveyed with something in flowers or plants. For there is no way to give expression to your feelings in a more appropriate, delicate or pleasing manner. Flowers do more to cheer the home than any other thing in the world.

"Say it with Flowers"

Planting Table

The table below shows the number of plants required to fill a circular bed of the dimensions given. In planting begin outside row—where 6 inches apart, 3 inches from edge of bed; where 12 inches apart, 6 inches from edge of bed. It is customary among professionals in planting a bed to set the plants somewhat closer together in the two outer rows, giving more space between each plant towards the center of the bed.

Diameter of bed	6 in. apart	12 in. apart	18 in. apart	24 in. apart	30 in. apart
3 feet	28	7
4 feet	48	12	6
5 feet	80	20	8
6 feet	112	28	13	7	..
7 feet	152	38	17	9	..
8 feet	200	50	23	12	..
9 feet	256	64	28	16	..
10 feet	320	80	36	20	13
11 feet	380	95	42	24	16
12 feet	452	113	50	28	18
13 feet	528	132	59	33	22
14 feet	612	153	68	39	25
15 feet	704	176	78	44	28
16 feet	804	201	89	50	32
17 feet	904	226	100	57	36
18 feet	1016	254	113	63	40
19 feet	1132	283	126	71	46
20 feet	1256	314	139	78	50

A square bed will take about the same number of plants. For an oval bed, add length and breadth and divide by 2. For example, an oval 7 feet long by 5 feet wide will require same number of plants as a circular bed 6 feet in diameter.

Orders from unknown correspondents must be accompanied with cash or satisfactory references furnished.

***Positively closed all day Sundays and afternoons
of all holidays***

General Directions

Important: Please Note

In submitting our 1929 Price List, our patrons can be assured that our stock is of unusually high grade quality, our motto being, "not how cheap, but how good." We strive to grow only the best varieties of plants suited to the purposes for which they are to be used and those which will stand the climate in our vicinity.

Quality and service are the foundation upon which our business is built.

IMPORTANT.—If possible please do not ask us to duplicate last year's order, or to use our own judgment. This is very indefinite, because we are at a loss to know what you have in mind, since very often there were several shipments of plants the year before. Kindly look up our last year's invoice or refer to our catalog. This avoids unsatisfactory filling of your order.

PLEASE NOTE.—When remittances are sent with orders to be forwarded by parcel post, postage must be added to the amount, as follows: 15 cents on orders amounting up to 50 cents; 20 cents on orders from 50 cents to \$1.00; 25 cents on orders from \$1.00 to \$1.50; 35 cents on orders from \$1.50 to \$2.00.

All parcel post packages are charged for at cost.

For the convenience of our patrons, when ordering by telephone after 6 o'clock p. m., and on Sundays and Holidays, the phone calls are 897 and 1092.

Our Greenhouses are closed on Sundays and on the afternoon of all holidays.

We are not responsible for packages sent by stage or auto bus. We deliver to bus terminal after which our responsibility ceases.

Plants in pots intended as gifts or that are to be left in pots cannot be sent by Parcel Post.

After May 15th and until after the 1st of June, patrons who call by auto expecting to take their plants away with them, must send in their order in advance of their coming, as it is very often impossible for us to put up such orders on short notice, so kindly send in your order and advise when you will call for it, and during the rush season we shall make every effort to have it ready when you call.

It is impossible to state definitely when plants can safely be set out, rather go by the calendar than by the weather. Perennials can be planted out when the ground in the open is in condition to be prepared to receive them, which is usually about May 1st. Tender plants should not be planted until after May 15th.

Small flower and vegetable plants can be sent by parcel post if requested, but we advise having all bedding plants which have been grown in pots shipped by express.

We make no charges for boxes or packing, nor delivery to transportation companies, but there our responsibility ceases. We cannot be held responsible for our goods while en route. If received in bad condition sign for them in that way and make complaint at once against transportation company.

To All Recipients of Burgevin's Plants and Flowers

Our plan for showing our appreciation of an order is not merely to thank our customer, but by trying to fill the order better than was expected.

We are always careful to check over and inspect every order before shipping, but errors will occur in a business which handles hundreds of orders daily, as we do.

We, therefore, suggest you examine the package as soon as received, and make sure the contents are satisfactory. If not, notify us at once, as we desire every recipient of Burgevin's flowers and plants to be a little more than satisfied. It is this desire that has built our business.

We grow all the plants and flowers we sell. You get them fresh, that's why they last so long.

Burgevin's cut flowers in a wide assortment of varieties with prices always moderate, have become absolutely dependable to our customers. The beauty and grade of our cut flowers rivals only their unusual lasting qualities.

FUCHSIA. There is an increasing demand for this old-fashioned plant, of which we can supply the leading Summer flowering varieties.....	.25	

Francis Lobdell. (See page 6)

DAHLIAS

This old-time Fall flowering garden favorite is again becoming very popular, largely because of the great improvement of the various types in the past few years, and because these newer varieties are easier to handle and are more free flowering. Avoid planting among shrubbery or in congested places, because Dahlias like plenty of open space for proper development. The varieties we offer have been tried out on our own grounds and found the most satisfactory as to productiveness and charming colorings of blooms in their respective classes, viz.: Cactus, Peony-flowered, Decorative, Show or Fancy, Collarettes, Pompon and Single-flowering.

CACTUS DAHLIAS		Each	12
Alabaster.	Pure white.....	\$0.50	\$5.00
Ambassador.	Yellow and salmon.....	1.00	
Amelia Dufour.	Delicate salmon with pink stripe.....	.25	2.50

WALLFLOWER. Summer-flowering.....	.15 1.50	

Hybrid Tea Roses

ROSES

So much depends on the proper preparation of the soil and the planting of Roses, that we give a few very important cultural directions *First:* Dig the bed up deeply from 12 to 18 inches, then thoroughly mix into the soil one large shovelful of well rotted manure (never use fresh manure for this purpose) for each plant you intend planting. After the bed has been leveled, dig a hole sufficiently large, but a trifle deeper than the top of the soil around the roots, then place the plant into the hole, filling in the soil around the roots, thoroughly firming it with your hands or feet, leaving the soil just a little lower around the plant than it is over the remainder of the bed, so that the water will go toward the roots instead of away from them. The foregoing applies to our Hybrid Tea Roses, which are mostly all on their own roots. The Hybrid Perpetual Roses are all grafted, and they should be planted deep enough, so that the lower branches of the plant are below the surface of the soil. Roses are gross feeders and when in a healthy state of growth an application of bonemeal, about one pound to 3 square feet of surface, thoroughly worked in the soil at intervals of three weeks, is very beneficial. Roses also like considerable moisture at the roots during the growing season, so when the rainfall is insufficient, water should be applied with the hose at the roots. Never spray foliage in the evening, as this causes mildew and black spot.

In the Fall before the ground freezes, the Hybrid Tea Roses should have a mound of soil placed around the plants from 10 to 12 inches high. After the ground is frozen to a depth of 3 or 4 inches, the entire bed should be covered with salt hay or coarse horse manure to a depth of 6 inches. Hybrid Perpetual Roses do not require the mounding of the soil around them, but the covering of the soil with coarse manure or salt hay is beneficial for these also.

Our Roses are all pot-grown and can therefore be planted out any time without disturbing the roots.

When remittance is sent with order to be sent by Parcel Post, add postage

HYBRID TEA ROSES

These Roses are not as hardy as the Hybrid Perpetual class, but with some protection have proved to Winter very satisfactorily. They are continuous and profuse bloomers, and with proper preparation of the soil will pay for themselves the first season. About forty best varieties in assorted colors.

First Size, \$1.00 to \$1.50 each, \$9.00 to \$12.00 per 12

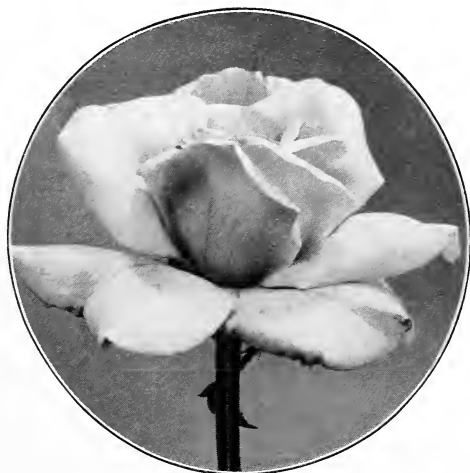

Angelus. White.

ANNUALS

All Stocky Plants, not Pot-grown but Transplanted

We think our patrons would be well advised in not placing too much dependence on Asters because plants for several years have been subject to disease, and with but few exceptions, have been almost a total failure. We suggest planting Zinnias of which the newer varieties are very beautiful and disease-resisting. We can supply them in all the distinct shades, such as orange, pink, yellow, pastel shades, etc. Scabiosa and Calendula also are good substitutes and are particularly immune from destroying insects.

	Early	Each	12	100

--

Shady Lawn Seed

Lb. 50c., 2 lbs. \$1.00, 5 lbs. \$2.25, 10 lbs. \$4.75, 20 lbs. \$9.00
--

The formula used for our grass seed consists of: **Fancy Red Top, 40%, Kentucky Blue Grass, 30%, Rye Grass, 10%, White Clover, 5%.**

We have selected a highly efficient combination of the best seeds obtainable and especially suited for this climate. We do not carry any cheap grades.

NOTE—Packages of grass seed this year are put up in pounds instead of quarts. This is the standard method of distribution, and, while the price per pound is the same as formerly charged per quart, the average for a pound of grass seed is one quart and one-half. We insist that no better seed can be obtained. The average percentage of germination is 85%+.

"Say it with Flowers"

WE are the largest growers of cut flowers in variety in the Hudson River Valley, and can therefore, supply anything in season upon short notice.

ORDERS BY TELEGRAPH OR TELEPHONE.—When flowers, etc., are wanted the same day or next, it is best to telegraph or telephone. We are members of the Florists' Telegraph Delivery, which is an established association of reliable florists, guaranteeing immediate delivery of fresh flowers of good value upon the receipt of telegraph orders from fellow members.

No matter where your friends live, it is possible for you to "Say it with Flowers."

You can come to us, tell us what flowers you want delivered, to what city, and the amount you wish to spend, and we will wire *at once* your order as you specify, together with your message to our correspondent florist in the city you designate, and he will deliver your flowers just as we would.

Flowers delivered to your friends on departing steamers, or anywhere in the civilized world, day or night, within a few hours' notice.

Buyers will be served with the best flowers at all times at this establishment and at moderate prices. A trial order, which must prove convincing, is solicited.

We are prepared to furnish decorations for all occasions, no matter how extensive or how small. We want to please everyone. Our facilities are without comparison.

When sending a box of flowers to a friend you get more for your money when leaving the selection to us than picking them out yourself.

We make a specialty of distinctive floral arrangements for weddings and social occasions, and our basket arrangements and flower accessories are delightfully attractive.

Choicest cut flowers in great variety, with everything appropriate to the season, and charming corsages for all occasions.

Wreaths of Magnolia leaves, Galax leaves, Autumn leaves, with and without flowers, for cemetery purposes.

If you will give us your orders a few days in advance of delivery date you will assist us and enable us to make better selections and give better service.

HOW TO ORDER.—Send your order just as soon as possible. This will assist us in shipping it promptly and assure you of getting what you want before our selection is broken.

WHEN TO SHIP.—Always be sure to state when you wish your order shipped and we will send at time mentioned. If not otherwise advised we will ship first express after receiving your order.

Our Collections of Hardy Chrysanthemums are superb.

Suggestions to Flower Lovers

The Care of Flowers and Plants

To prolong their life and fragrance the stems of flowers should be cut off each morning when the water is changed. They should be placed in a cool room over night with their stems immersed as deeply as possible in water. Rose buds should be sprayed with clear water, and Violets will retain their fragrance much longer if covered with tissue paper.

All blooming plants should be watered at least once, and perhaps twice, daily, and their period of blooming will be increased if kept in a light, cool room. The leaves of any plant should be kept free from dust.

The Care of Potted Plants

The cool days of Winter are cheered by pretty flowering and foliage plants; but while they are particularly fascinating at this time, it is during the coldest days that the plants require the most attention.

Never allow them to stand in front of an open window or in a cold draught. The intense dry heat in homes on extremely cold days will dry out the soil and wither or permanently injure most plants in a few days.

The pots of plants should be immersed in a pail of water for several minutes on very cold days, while in milder weather, on alternate days, or even twice a week, will suffice to keep the plants in a healthy condition, with the exception of forced plants, such as Azaleas or Lilacs; these should be thoroughly watered every day.

We can furnish many plants not herein listed and will quote prices on application.

We deem it a pleasure to advise our friends and patrons, upon request, as to when, how and what to plant for specific purposes and gardening in general. Visitors are welcome to our grounds and greenhouses, which are always open to the public. Week days, from 7 a.m. to 6 p.m.

***Positively closed all day Sundays and afternoons
of all holidays***

**AIRPLANE VIEW OF OUR GREENHOUSES AND
PART OF THE 200 ACRES OF LAND, WHERE
THE FLOWERS WE SELL ARE GROWN**

An aerial photograph showing a large complex of white, peaked greenhouses arranged in a row. To the left of the greenhouses is a tall, thin smokestack. In front of the greenhouses are several smaller, dark-colored buildings, including a two-story structure and a smaller one-story building. The entire facility is situated on a flat area, with a dense forest of trees in the foreground and rolling hills in the background.
